Detailed Inventory
PHS Name: Canyon Park Water Supply Corporation PID#: T3187034

Purpose of this worksheet: To provide a format water systems can use to track materials for each service line in the distribution system.

General Instructions: Each row in this worksheet represents one service line connecting the water main to the customer's plumbing. The worksheet includes required and recommended elements; the columns with the aqua shading are required by the LCRH. The worksheet includes examples in rows 12 - 20 and is formatted for approximately 10,000 entries.
Note: Cells that have a superscript "a" are required fields. Cells that have a superscript "b" are conditionally required fields and can impact formulas throughout document.

A Unique ID is recommended for each service line.	Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include a landmark, intersection, block, or other details to specify service line locations. If using GPS coordinates, utilize the GPS Coordinate - Latitude/Longitude fields and include a decimal place.							Dropdown list includes recommended subclassification, if "Non-Lead Other", otherwise in Notes field	Select Yes, No, or Don't Know. Important for determining if downstream replacement is required.	Dropdown list when the service line was installed or replaced	Use this field for documenting additional relevant information, including when applicable.	Dropdown list includes recommended subclassification, if "Non-Lead Other", otherwise in Notes field	Date, year, or estimated date range when the service line was installed or replaced	Can use this field for documenting additional relevant information, including when classification changes.	Dropdown list includes four required service line classifications of Lead, Non-lead, Galvanized Requiring Replacement, or Unknown	For example, lead gasket/seal or pigtail where the water main is connected to the service line	Select Yes, No, or Don't Know	For example, backflow preventer or meter containing lead	Note: This information may be helpful for identifying lead tap monitoring locations.
